Description

The Aeroflow Performance Electronic Fan Controller allows the user to control aftermarket electronic cooling fans. This unit can control only one fan and can set the fan to turn on or off at preset temperatures.

The back-lit digital LED display can also provide real time water or oil temperature and voltage. A peak hold function memorizes and displays the max temperature value.

Kit includes:

- Led Display Fan & Temperature Controller
- 2 Temperature sensors (1/8" NPT male threaded sensors updated sensors are both the same size and length) with temperature ranges from 30°C-130°C.
- Wiring kit with 12v 30-amp relay

Replacement sensor is AF59-1029
