### Description

PART # ARO11209

Ideal for carburetted power plants not using a separate fuel pressure regulator. The H/O Fuel Pump is designed for engines making 200-600 HP and is ideal for street cars and mild race cars alike. Similar to the SS Fuel Pump (P/N 11203), but internally regulated to 7 PSI.

- Features 3/8" NPT inlet and outlet ports
- Durable billet construction
- Fuel flow exceeds 90 GPH at 5 PSI and draws less than 5 amps
- Internally regulated to 7 PSI, eliminating the need for a separate regulator on most carburettors
- Rated for continuous duty, the pumping mechanism features a composite rotor, stainless steel vanes and heat treated steel top and bottom plates for durability
