### Description

Pavtek Part # CC-630-16

#### **Super Locks™ ? 10°**

- Wider angle (10°) locks better distribute the ever increasing valve spring loads over the retainer than typical 7° locks -reducing the chance of "pull-through" failure
- Precision-machined rather than stamped for the ultimate in accuracy
- Super-tough, fatigue resistant alloy material
- Inside tang-to-taper relationship held tightly for repeatable valve spring installed heights
- Available in +.050" installed height versions
- For simplicity, any Super Lock™ fits any COMP Cams® 10° retainer – just choose the correct lock for your valve size and application
- Super Locks™ are recommended in all race applications
