Description

Pavtek Part #ED-2790

These single-plane, low-rise intakes work well for high-rpm, high-performance street applications. Ideal for applications where hood clearance is limited, they produce gains in top-end horsepower with adequate throttle response. Not intended for mileage or emissions applications, they are only for high-performance vehicles. Fits Red motor Cylinder Heads only (with single bolt in centre of manifold), will NOT fit on Blue/Black motor heads.
