Description

**RP-3164**

Speed-Pro's new line of performance pushrod sets are ideal for the budget conscious performance enthusiast. They have many features normally found in more expensive pushrods, and are sold in economically priced sets to complete a professional engine rebuild. These pushrods are made in the USA, from high quality 1010 steel. They are hardened to make the guide plate compatible, tumble polished to remove surface imperfections, and black oxide coated for corrosion protection and a professional appearance. Part numbers are laser etched on each pushrod for positive identification
